## PROFILE

I am a self-taught web developer with a strong motivation to grow as a Front-end Developer. I have practical experience creating user-friendly, responsive, and visually appealing interfaces through my personal projects, and I have also contributed to team-based development in one of them.

My journey began with design, so I am well-versed in Figma and UI/UX principles. Over time, I discovered that I derive the greatest satisfaction from bringing ideas to life through coding.

I enjoy building new projects, continuously improving my skills, and working on user-centered solutions. I am seeking an opportunity to join a team where I can develop as a developer and contribute meaningfully to shared goals.

## SOFT SKILLS

Self-motivation	Flexibility
Communicativeness	Adaptability
Responsibility	Stress resistance
Ability to work in a team	Critical thinking

## WORK EXPERIENCE

**Britlex** is a layout-focused project aimed at practicing modern HTML/CSS techniques and responsive design principles. It was built to improve skills in semantic markup, Flexbox, Grid, and adaptive UI patterns, providing a solid foundation in frontend development fundamentals.

**MoneyGuard** is a full-featured web application for managing bank accounts and financial transactions. It allows users to create and modify accounts, perform transactions, and track financial flows with detailed reports and charts. The project was developed collaboratively with a backend developer, highlighting strong skills in teamwork, UI development, and data visualization using React and charting libraries.

**Portfolio** is a personal website designed to present my skills, experience, and project work in a clean, modern, and user-friendly format. Built with React, the site features smooth animations, responsive layouts, and a polished UI, showcasing my frontend development abilities and design sensibilities.

**StreamVibe** is a modern web application for discovering and watching movies and TV shows. It features a responsive and intuitive user interface developed with React and efficient state management using Redux Toolkit. The project demonstrates proficiency in building real-world frontend applications with a focus on performance, usability, and seamless user experience.

**GreenMotive** is a modern, animated landing page promoting sustainable technologies and eco-innovation. Built with React, TypeScript, GSAP, Vite, and SCSS, with experimental Three.js elements.

## EDUCATION

Sumy State University. Bachelor's Degree, Major: Cybersecurity

## PROFESSIONAL SKILL

HTML		TypeScript	
CSS		Next JS	
SCSS		Git	
JavaScript		Figma	
React		Webpack	
Redux Toolkit		Vite	
GSAP		PostgreSQL
